

David Mohammed, PMP, PCCSE, CSPO

Brandon, FL, 813-716-5045, virtualmoha@gmail.com, linkedin.com/in/david-a-mohammed

Professional Summary

Solutions Consultant and Pre-Sales Systems Engineer with 17+ years of experience architecting and positioning enterprise network security, Zero Trust, and Palo Alto Networks solutions. Proven track record conducting customer discovery, delivering high-level designs (HLD), running technical demonstrations, and executing proof-of-concept validations across NGFW, Prisma Access (SASE), and cloud security environments. Drove 30% year-over-year account expansion, secured 100% contract renewals, and managed technical strategy for a \$12M+ services portfolio by translating complex cyber requirements into clear business value. US Army Veteran with active government clearances.

Core Competencies

Solutions Consulting, Pre-Sales Engineering, Palo Alto Networks Portfolio (NGFW, Prisma Access, SASE), Zero Trust Architecture, Customer Discovery & Account Planning, Technical Validation & Demos, High-Level Design (HLD), Cross-Functional Leadership, Proof of Concept (PoC), Competitive Differentiation, Customer Adoption & Enablement, Cloud Security (AWS, Azure), Identity & Access Management (IAM), Statement of Work (SOW) Scoping

Certifications

- Palo Alto Networks Prisma Certified Cloud Security Engineer (PCCSE)
- Palo Alto Networks Certified Network Security Administrator (PCNSA)
- Project Management Professional (PMP), Certified ScrumMaster (CSM), Certified Scrum Product Owner (CSPO)
- AWS Solutions Architect Associate, AWS Certified AI Practitioner, Azure Administrator
- CompTIA Security+, ITIL 4, Lean Six Sigma Yellow Belt, Fortinet FCA, Cisco CCNA, JNCIA
- Okta Professional (Target: 06/26), Active Government Clearances

Professional Experience

Mo-Blind Solutions LLC, Brandon, FL

AI Consultant & Pre-Sales Technical Advisor, September 2024 – Present

- Deliver pre-sales technical consulting, discovery sessions, and live solution demonstrations, translating client operational challenges into production-ready automated workflows and secure cloud integrations.
- Architect and deploy secure cloud API integrations, IAM services, and MCP server pipelines across multi-product environments, improving cross-platform system interoperability by 40%.
- Develop governance guardrails, deployment playbooks, and adoption frameworks that accelerated system adoption rates by 40% while reducing client operating costs by 25%.

AT&T Cybersecurity, Tampa, FL

Senior Pre-Sales Solutions Consultant & Technical Project Manager, June 2007 – May 2024

- Partnered with enterprise sales teams to drive technical discovery, author Statements of Work (SOW), and architect cross-platform Palo Alto Networks solutions (Prisma SASE, NGFW, Zero Trust), driving 30% YoY account expansion and 100% contract renewals across a \$12M portfolio.
- Conducted high-impact technical demonstrations, validation workshops, and executive briefings for C-suite and security engineering stakeholders, simplifying complex Zero Trust and App-ID/User-ID concepts into clear business ROI.
- Led technical validation engagements and proofs of concept to secure the technical win against legacy architectures, migrating 3,000 enterprise locations to modern cloud-delivered network security platforms.
- Orchestrated cross-functional teams of 20+ specialists across sales, professional services, customer support, and engineering to build seamless deployment plans, reducing onboarding timelines by 50%.
- Designed customer enablement materials and operational runbooks for 150+ corporate accounts, boosting platform adoption by 40% and decreasing post-deployment support tickets by 25%.

AT&T Global Network Services, Tampa, FL

Implementation Manager & Technical Pre-Sales Support, September 2002 – June 2007

- Supported pre-sales engineering for 2,500+ firewall, IPsec, and VPN opportunities, conducting technical requirements discovery and scoping delivery frameworks to shorten the sales-to-deployment cycle.
- Engineered and validated secure network designs utilizing L2-L4 networking principles (routing, switching, VLANs, BGP/OSPF) across 2,000 enterprise client sites while maintaining 99.9% uptime.
- Automated provisioning workflows using scripting, reducing deployment hours by 48% and accelerating customer time-to-value.

Military Service

- US Army, Combat Medic, Fort Drum, NY

Education & Community Leadership

- **Bachelor of Arts in Chemistry**, University of South Florida, Tampa, FL
- **Project Management Professional Certificate**, Syracuse University IVMF, Syracuse, NY
- **Chief Financial Officer**, 10CAN.org (Oversee \$160K budget supporting 900+ veterans)
- **Veteran Mentor**, ACTNowEducation.org (Mentored 30+ transitioning veterans into cybersecurity careers)
